

Rosie Research's Personal Protective Equipment (PPE)

Rosie loves to be in the lab, but she also loves to be safe for whatever experiment she may encounter. Flat Rosie comes with standard lab apparel, closed toe shoes, no jewelry and with her hair up. But, if your lab requires more PPE, please, by all means, make her safe!

What did we make for her? She has a BL4 HazMat suit for seriously sticky situations, but otherwise she has nitrile gloves, face mask, goggles, laser goggles and a lab coat. If Rosie is joining you for some theoretical calculations we added in a handy pencil.
