

Flat Rosie in the Lab

Rosie loves to visit labs and learn all about the research happening behind closed doors. Print, decorate and cut out Flat Rosie, then gather the addresses of your favorite labs worldwide. Rosie may just get lucky enough to get in the door and snap a shot working on an interesting experiment. Don't forget to print and send her off with all the personal protective equipment she might need.

Upload your photos to social media and tag them #RosieResearch to help spread the word and bring cutting edge reesearch to kids.
